	Keynote Speaker Sessions	
	Opening Remarks	
	<p>Opening Keynote Speaker: Dr. Sean Clarke, RBC Chair in Cardiovascular Nursing Research <u><i>Nursing, Healthcare and Global Economic Instability: Opportunities for Leadership</i></u></p> <p>A rapidly evolving worldwide financial crisis, superimposed on demographic and population health trends affecting health care across Canada and the world, has thrown a wrench into the plans of many in health care, including nursing students. Most leaders admit that we are still bracing for the full impact of these changes. And yet with crisis comes opportunities for those who are prepared. In this presentation, we'll talk about the trends that have begun to emerge, particularly here in Canada, but more importantly we'll discuss the possibilities new developments will open for nursing in the health care system and what the trends mean for you in terms of decisions you'll be making about your career.</p>	
09:00 – 12:30	<p>Jane Mosley, Chief Nursing Executive, Women's College Hospital <u><i>Ambulatory Care Nursing: An Extraordinary Opportunity at WCH</i></u></p> <p>Women's College Hospital has a 100 year history of excellence in Nursing. This presentation will focus on the following key questions: What is academic ambulatory care nursing at its best? What is necessary to enable the best of academic ambulatory nursing, and how has WCH evolved to meet this innovation?</p>	89 Chestnut Ballroom
	<p>Dr. Lynn Nagle, Assistant Professor, Lawrence S. Bloomberg Faculty of Nursing <u><i>Informatics Transforming Nursing</i></u></p> <p>As society is experiencing unprecedented change as a result of advances in information and communication technologies, so too are the processes of healthcare delivery being altered. Informatics or the transformation of data to information to knowledge through the use of these tools is emerging as an essential area of focus for nurses in every role. It is central to a nursing culture and practice which is oriented and informed by evidence. This session will explore the opportunities and challenges faced by the profession as informatics becomes core to the work of every nurse.</p>	
	<p>Closing Keynote Speaker: Mary Jo Haddad, President and CEO, The Hospital for Sick Children <u><i>Leading with Passion</i></u></p> <p>Healthcare is a complex system that depends on the skills and talents of its professionals for care, teaching, research and management. Everyone has the capacity to lead - as individuals, as team members and as appointed leaders. Mary Jo Haddad will use her experience to share with the audience the opportunities that abound to make a difference, big or small, as nurses in the healthcare system.</p>	
	Closing Remarks
